MATERIAL SAFETY DATA SHEET

3. HAZARD IDENTIFICATION

POTENTIAL HEALTH HAZARDS

Route of Entry:	Inhalation, Skin Contact
Target Organs:	N/A
Inhalation:	Breathing of fibers or dust may cause mechanical irritation of the mouth, nose, and throat. Textile sizing normally burns off of the surface of the glass fiber the first time the product is heated to about 400F. If this occurs with inadequate ventilation some smoke may accumulate causing temporary irritation of the eyes, nose and throat.
Skin Contact:	Not considered hazardous
Eye Contact:	Not considered hazardous. It may cause mechanical irritation if film comes into contact with the eye.
Ingestion:	Not a route of exposure. Not considered hazardous.

Not classified as regulated under ACGIH IARC, NTP or OSHA.. Industry studies have shown textile grade fibrous glass to be a non-carcinogen.

4. FIRST AID MEASURES

Inhalation:	Remove victim to fresh air.
Skin Contact:	Flush with ample cool water followed by washing with mild soap to remove accumulated fibers.
Eye Contact:	Flush with flowing water for 15 minutes and seek medical attention.
Ingestion:	Not likely to occur through normal use, should Ingestion occur seek medical attention.

5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

Flash Point (Method Used): N/A

LEL: N/A

UEL: N/A

Extinguishing Method: Water, dry powder, or foam (needed for packaging only)

Special Fire Fighting Procedures: In any sustained fire wear self-contained breathing apparatus.

Unusual Fire and Explosion Hazards: In a sustained fire combustible decomposition products may be released. These products include carbon dioxide, carbon monoxide, and low molecular weight hydrocarbons

6. ACCIDENTAL RELEASE MEASURES

(Always wear recommended personal protective equipment.) Collect and place in a solid waste container.

7. HANDLING AND STORAGE

Handling Precautions: Use normal personal hygiene and good house keeping.

Storage Requirements: Store in a cool dry place.

MATERIAL SAFETY DATA SHEET

8. EXPOSURE CONTROL/PERSONAL PROTECTION

Engineering Controls: Normal area ventilation is sufficient in most cases to keep dust and fiber levels below the TLV or PEL and to avoid smoke accumulation during the initial heating of the textile size.

Protective Equipment: If airborne fibrous glass exceeds the regulatory limits, or if upper respiratory irritation occurs, use a respirator designed for nuisance type dust. Barrier creams, gloves, and long sleeve loose fitting clothing may be required for certain workers who have sensitive skin or contact dermatitis. Work clothing should be laundered separately from other clothing before reuse. Not normally required, but as a good safety work practice suggest the wearing of appropriate eye protection such as safety glasses/side shields or equivalent whenever use of the product releases airborne fibrous glass.

Exposure Guideline/Other:

Fibrous Glass Dust

PEL (OSHA): 5 mg/m³ (Respirable)
