## 8. EXPOSURE CONTROL/PERSONAL PROTECTION

---

**Engineering Controls:** Normal area ventilation is sufficient in most cases to keep dust and fiber levels below the TLV or.

**Protective Equipment:** If airborne fibrous glass exceeds the regulatory limits, or if upper respiratory irritation occurs, use a respirator designed for nuisance type dust. Barrier creams, gloves, and long sleeve loose fitting clothing may be required for certain workers who have sensitive skin or contact dermatitis. Work clothing should be laundered separately from other clothing before reuse. Not normally required, but as a good safety work practice suggest the wearing of appropriate eye protection such as safety glasses/side shields or equivalent whenever use of the product releases airborne fibrous glass.

**Exposure Guideline/Other:**

Fibrous Glass Dust

TLV (ACGIH): 10 mg/m<sup>3</sup> (Inhalable)  
PEL (OSHA): 15 mg/m<sup>3</sup> (Respirable)
